IPHONE/CELL GSM CODES

***#06#** – Displays your International Mobile Equipment Identity (or IMEI). GSM network uses to identify valid devices; used to stop a stolen phone from accessing the network.

***#21#** Settings for call forwarding for calls, data, fax and sms.

***#30#** Calling line presentation check.

***31#** (followed by the number you are dialing) – Sets outgoing "Caller ID" to be private.

#31# (followed by the number) – Sets outgoing "Caller ID" to be visible.

***#31#** (followed by...) – Displays current setting of outgoing "Caller ID". (Disabled = visible, Enabled = private).

***#33#** and press Call. Check for call all barring.

***#43#** and press Call. Determine if call waiting is enabled.

***#61#** and press Call. Check the number for unanswered calls. Shows the number for voice call forwarding when a call is unanswered. Also shows the options for data, fax, sms, sync, async, packet access and pad access.

IPHONE GSM CODES POCKET GUIDE

***#76#** and press Call. Check whether the connected line presentation is enabled or not.

***225#** and press Call. Bill balance for postpaid accounts only.

***646#** and press Call. Check the minutes for a postpaid account only.

***777#** and press Call. Check the account balance for a prepaid iPhone.

Field Test menu

The Field Test menu is used to view various engineering parameters, such as signal strength, frequency band, tower ID, et cetera.

This is a menu that lets you look at the inner workings of the iPhone from a telephone technician's view.

The great majority of iPhone users will never need access to this menu. If you do not know what you are doing, then DO NOT change anything here, problems could occur.

You get to this menu by entering ***3001#12345#*** and press Call.

Thanks!

Foob 15 July 07; Day 2 of iPhone
